

Senior IT Analyst/Programmer

Purpose and Scope of Job: Serve as the primary Information Technology Analyst independently performing work in the analysis, development, implementation and support of the electronic exchange of medical information. Specifically, facilitate the effective import of data from independent, third-party systems to a common, existing database structure. Job is comprised of approximately 50% analysis, 30% programming and 20% testing and data verification.

Education and/or Experience: Bachelor's degree in Computer Science or Information Systems or equivalent work experience. Working knowledge of medical and health-related data.

Responsibilities:

- Analyze and independently identify complex technical problems
- Serve as a technical contract for interfaces during implementation process
- Exercise independent judgment to determine the appropriate course of action to be taken during an interface implementation based on the analysis performed and all effective evaluation of possible solutions.
- Research HL7 –ADT/SCH/R01/O01 transactions to determine level of compliance with the standard
- Develop programs and processes to translate data from various third-party medical data system systems into a standard format that feed a common, existing database.
- Translate requirements into design solutions
- Prepare detailed high/low level design documentation
- Walkthrough the design with business partners
- Prepare Test Plans
- Program solutions
- Support business teams through implementation and acceptance testing
- Apply technology concepts to business needs
- Develop and manage requirements and process flows
- Demonstrated excellence in analysis, documentation, and presentation tools

Skills Required:

- Strong technical aptitude and data analysis skills
- Demonstrated expert proficiency with data manipulation, translations, and conversions.
- Knowledge of healthcare industry as it relates to electronic medical records
- Ability to balance multiple priorities
- Excellent oral, written, inter-personal, and strong customer service skills
- Detail oriented
- Excellent organizational skills
- Excellent Multi-tasking skills
- Display dependable, punctual and professional demeanor
- Knowledge of SQL, Crystal Reports, and at least one high-level programming language
- Significant experience troubleshooting proprietary software
- Possess strong problem solving skills
- Ability to be self-sufficient and work independently as well as in a team environment
